

Lattarico - The church of the Immacolata

The church of the Immacolata of the Greek cross has a lovely portal with arch and a small vented tower. Here there are many wooden statues: San Francesco di Paola, S. Giuseppe col Bambino, San Rocco, Santa Lucia and the Madonna del Rosario. In sacristy is conserved the canvas of anonymous author of the XIX century in which the Immacolata is represented and the beautiful wooden statue of the Madonna del Pettoruto, named after the appellative "Petruto", which means stony or rocky. The Madonna is venerated in particular by infertile women, who pass singular manifestations of faith to honour her.
